- ✓ Self-motived, actively seeks out and tackles problems

PERSONAL PROJECTS

Game Development

- *C++ Maze Project*
  - Created and developed a Maze game utilizing C++ and object-oriented programming techniques.
  - Implemented game logic and mechanics, including user input handling and collision detection.
  - Utilized various data structures, such as arrays and linked lists, to efficiently store and retrieve game information.
  - Developed a user-friendly interface for players to navigate the maze and reach the end goal.

Web Development

- *Ripeopedia*
  - Developed and designed a website using HTML, CSS, and JavaScript that allows users to input the state of their food (ripe, raw, overcooked, etc.) and generates a list of recipes based the input.
  - Utilized JavaScript to dynamically update the website with appropriate recipes, and used CSS.
  - Implemented user input validation and error handling to ensure accurate and efficient generation.
  - Utilized debugging techniques to troubleshoot any bugs that arose during development.

Chrome Extension

- *yourCart*
  - Developed a Chrome Extension that web scrapes online shopping websites to track the user's spending habits.
  - Implemented a database to store the scraped data, allowing the user to view their spending history over time.
  - Deployed the extension to the Chrome Web Store for users to easily install and use.
